

# Walk Test

The Walk Test is a means of testing the detectors, without disturbing your neighbours with continuous loud sirens.

1. Press the test button, also known as the **#** key.
2. The display will prompt you for your code. 
3. Once you have entered your code, then siren will sound for 2 seconds and the display will change to **TESTING**.
4. Walk throughout the protected area and make sure you trigger every detector with no exception. Each time a detector is triggered the **"happy Tune"** will sound and the zone name and number will be displayed briefly.

Once the Walk Test is completed, click the **SHOW/OK** button repeatedly to display the test results, zone after zone, in ascending numerical order.

To resume testing, click **HOME**

To quit the test mode, click **AWAY** then click **SHOW/OK** to revert the display to its normal state.

Of course if you have any difficulty with the process on this page then feel free to contact our customer service team on **0845 55 70 999**.

Many Thanks
